

## POLICY

Denith Engineering SA (Pty) Ltd is a highly innovative engineering company providing concepts, systems design, detail design, and manufacturing solutions to the mining, energy and construction industries, both land-based and marine.

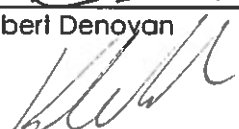

Our aim is to establish long term relationships based on experience and trust with our clients and suppliers by providing services of the highest quality in accordance with the requirements of ISO 9001:2015. We build these relationships by implementing continual improvement actions in regards to our service, product and within our company structure.

We stringently adhere to the legal requirements of The Republic of South Africa as well as the international requirements of the clients we work with.

People are our most important asset, and we strive to provide a work place where our team can learn, grow and develop. We are acutely aware of safety, health and environment and we work to achieve the highest standards in all our work places.
